

We are a design agency based in Cologne. We are experts in User Interface Design, Interaction Design, UX Design and Usability Engineering in the area of the automotive industry.

Often a change of perspective is necessary to recognize what hinders the user or induces mistakes. We analyze usage contexts and find out how the synergy between human and machine can be optimized.

Our team of 10+ employees supports all stages of product development and knows how to implement user centred products and services – with expertise, engagement und enthusiasm.

Web Developer (m/f/*)

Your Todos

- Develop user centered responsive web projects with
 - React.js (Functional Components, useEffect, useState, useReducer, ...)
